DETROIT, Mich., Aug. 9.—Today was a bad day for form players at Woonsocket and a day for favorites finishing first. PRICES RISE ON LEADERS.
Government Crop Report a Disappointment—Market Closed Irregular.

New York, Aug. 9.—United States Steel at 87 1/4. Union Pacific at 205 3/8. Reading at 120 1/2. Great Northern Ore certificates at 86—these were the points in the day's stock market that attracted attention, showing new record prices for these leading favorites of the stock market speculation. The three first named stocks absorbed an overwhelming amount of the day's total dealings. The only particular influence bearing on these movements was the news that the remaining holdings in the Union Pacific treasury of Great Northern Ore certificates and of Northern Pacific and Great Northern preferred had been marketed, thus adding to the enormous free cash in the hands of the Union Pacific. The inference drawn from this was that a block of Great Northern Ore certificates that had been overhauling the market with threatening effect, having been absorbed, the stock was entitled to a rise. The profits indicated to the Union Pacific was a help to that stock also. Less was heard of surmises that have been prevalent since that a block of Union Pacific's holdings of stocks held for investment became known of the intended destination of the proceeds of these sales for investment. Buying of New York Central for Union Pacific account has been a favorite conjecture of the speculative element, but it was not heard today. There arose some question, instead, whether a policy of liquidation of investment holdings was not in force by Union Pacific. Discussion was revived also of the condition of E. H. Harriman's health. Another influence on the early stock market, or at least a portion of it including the stocks of southern railroad companies, was the news of general rains in Texas over Sunday and Monday. The hope of benefit to the important portion of the cotton crop grown in that state was clearly reflected in the downward plunge in the price of cotton and stocks of railroads which have a large cotton traffic also responded. A rise in the London price of copper failed to benefit Amalgamated Copper but American Smelting and National Lead were amongst the early strong features. Expectations had been raised for a high degree of the favorable character to be shown by the government crop report. This was a help to the early strength in stocks. The report was not heard today in the period of suspense before the publication of the report. This was due to a fear that however favorable the report might prove, sales of stocks would be pushed to realize profits when the news was published. As a matter of fact the report was disappointing, especially in the condition estimate on corn. Hasty short covering rallied the market, but the closing tone was irregular. A dinner tone in the call loan market was an incident of the day which was the consequence of the considerable loan upon the surplus reserves of the banks made by last week's decline in cash holdings. Bonds were irregular. Total sales, par value, \$4,624,000. United States four coupon declined 1-4 per cent. on call.
